Many of the stones recorded by Mr. Partridge in 1927 were moved c. 1961 under a faculty dated 7 October 1959; no contemporary record of their former and new locations is known to have been made. In the course of copying Mr. Partridge's manuscript, the need arose to check some of the inscriptions and a large number of overgrown and not easily accessible stones were consulted before those required were found. It is hoped that this appendix will make it easier to locate repositioned stones for at least a few years to come.
